Good luck on your exam!

AWS Device Farm

AWS Device Farm is an **application testing service** to test your applications in different environments.

Mobile Device Testing

- You can test Native iOS (.ipa) or Android (.apk), or Mobile Web-Apps
- You can utilize built-in tests Fuzz which will randomly test actions
- Videos will be capture of runs
- Screenshots will be captured of run
- You can choose multiple devices
 - AWS own physical phones that you virtually connect to
- You can **remotely connect** to a phone and upload your app to do general troubleshooting against a real phone.
- You can test using a suite of test using Appium
 - Appium Java Junit
 - Appium Test NG
 - Appium Python
 - Appium Node.js
 - Appium Ruby

Desktop Browser Testing

- You can test your web-application against multiple web-browser
- You use Selenium to write your tests
