AWS Audit Manger contains:

- **Framework Library** — Browse the library of control frameworks that support various compliance standards.
 - eg. PCI, CIS, **SOC2**, HIPAA, and more.
- **Control Library** — Browse existing controls, or create your own controls to use in a custom framework.

- You can create **assessments** to review the evidence collected and generate an assessment report
- You can continuously **collect evidence** by directly integrating AWS Config and AWS Security Hub
