AWS Personal Health Dashboard

AWS Personal Health Dashboard provides **alerts and guidance** for AWS events that might affect your environment.

All AWS customers can access the Personal Health Dashboard.

The Personal Health Dashboard shows recent events to help you manage active events, and shows proactive notifications so that you can plan for scheduled activities

Use these alerts to get notified about changes that can affect your AWS resources, and then follow the guidance to diagnose and resolve issues.

The screenshot displays the AWS Personal Health Dashboard interface. At the top, the 'Dashboard' header includes a refresh button and a timestamp 'Last refreshed 5 min ago'. Below this is an 'Overview' section with three cards: '0 Open issues Past 7 days', '1 Scheduled changes Upcoming and past 7 days', and '1 Other notifications Past 7 days'. A red arrow points from the text 'alerts and guidance' to the 'Scheduled changes' card. To the right is a 'Set up alerts' section with a 'Create rule' button. Below the overview is a tabbed interface with 'Open issues', 'Scheduled changes' (selected), and 'Other notifications'. The 'Scheduled changes' tab shows a list of events, with one event highlighted: 'EC2 persistent instance retirement scheduled'. This event is detailed in a sidebar on the right, showing its status as 'Upcoming', its start and end times, the affected region (us-east-1), and a description of the hardware degradation and retirement process. The event summary on the left also lists this event with its last update time.

Event data

Event	EC2 persistent instance retirement scheduled	Start time	March 19, 2021 at 6:35:40 PM UTC-7
Status	Upcoming	End time	March 19, 2021 at 6:36:40 PM UTC-7
Region / Availability Zone	us-east-1	Category	Scheduled change
Affected resources	1		
Description	EC2 has detected degradation of the underlying hardware hosting your Amazon EC2 instance associated with this event in the us-east-1 region. Due to this degradation your instance could already be unreachable. We will stop your instance after 2021-03-19 18:36:40 PST. Please take appropriate action before this time.		
	You can find more information about retirement events scheduled for your EC2 instances in the AWS Management Console https://console.aws.amazon.com/ec2/v2/home?region=us-east-1#Events		
	What will happen to my instance? Your instance will be stopped after the specified retirement date. You can start it again at any time after it's stopped. Any data on local instance-store volumes will be lost when the instance is stopped or terminated.
